Upgrading existing Sumilabel software to Sumilabel Lite

Overview:

Sumilabel Lite is a free upgrade for existing Sumilabel customers. Sumilabel Lite displays all features required to create, edit and print markers on a single page. Sumilabel Lite offers all the tools available within existing Sumilabel application, with exception of ability to create multiple jobs within 1 set, add graphics, logos and barcodes or data importing features. These features will be accessible only within advanced Sumilabel version.

Application:

To upgrade to Sumilabel Lite, your computer must be connected to the internet.
1. From the starting page of Sumilabel, go to Tools>Check for Updates.
2. Click Update and wait for Progress bar to complete download process. Once all updates have been downloaded, click OK button.
3. New Update window will appear. Click Update. Window will disappear and Sumilabel will launch.

On Sumilabel homepage view, you will see 2 icons on the far right, upper corner, next to the Sumilabel logo. To utilize Sumilabel advanced version, click the left icon. To utilize Sumilabel Lite version, click the right icon with lighting bolt graphic.
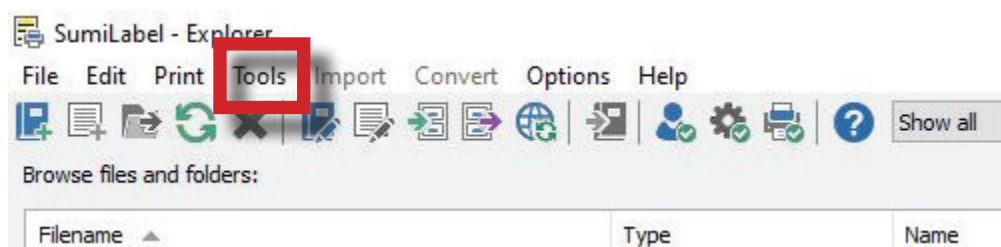

When choosing Sumilabel Lite, you will see only one (1) page interface. All files can be saved for future editing and printing.

Please see next page for visual instructions

Visual References:

The following are visual representations of how to update your Sumilabel application to the new Sumilabel Lite version.

Click Tools menu option for steps 1 thru 3.

Click icon on right side, with lightning bolt, to access Sumilabel Lite. Once clicked, the icon will be highlighted to show you are operating within the selected version.
